## Introduction

At Hindustan Hospi Hub, we specialize in providing state-of-the-art **Medical Gas Pipeline Systems (MGPS)** and **Modular Operation Theatre solutions** across India. With nearly two decades of experience in the medical sector, we have earned the trust of over **650+ clients nationwide**, delivering excellence in healthcare infrastructure.

Our team has successfully completed the setup of **350+ Modular Operation Theatres** and the installation of **MGPS systems in 720+ hospitals**, empowering healthcare institutions with safe, reliable, and advanced facilities.

We believe in building long-term, trust-driven relationships, ensuring not only project success but also sustainable growth for our partners. At Hindustan Hospi Hub, we are committed to creating healthcare environments that meet global standards of quality, safety, and efficiency.

## Modular Operation Theatre

### Features

- A continuous flow of highly filtered 'bacteria-free' air is reticulated under positive pressure into the operating field and air contaminants generated during surgery are removed from the site.
- Anti-bacterial paint.
- Seamless
- Easy to clean steam cleaned, electro metric (ideal for high humidity areas)
- Vapour permeability (allows substrate moisture to escape) protects against growth of bacteria, mold and yeasts.
- Humidity control for moisture resistance, freeze/thaw resistance.
- Use of optimum quality raw materials
- Compact structure
- Easy to install and remove
- Low maintenance cost

## Modular Operation Theatre

### Most Popular Equipment

- The Wall and Ceiling
- Plenum Unit (Laminar Air Flow)
- Air Handling Units
- HEPA Filters
- High Quality Antibacterial Anti-static Flooring
- Parapheri Lights
- Ceiling Pendants
- Hermetically Door
- Surgeon O.T. Control Panel
- LED X-ray Viewer
- Equipment Storage Unit
- Pressure Relief Damper
- Pressure Differential Display

### Optional Equipment

- Scrub Sink
- O.T. Table
- Anti-Static Flooring
- Writing Board
- View Window
- Hatch Box

We provide  
**Full Technical Support**  
after installation of  
Modular OT

We are helping Surgeons  
by installing latest technology equipments  
to make surgeries **Safer**

## OT LED Lights

Our LED Surgical lights provides cold, shadowless and brighter light area for long surgeries, without any interruption to surgeons.

LEDs have a technical advantage over the traditional halogen lamp, which produce heat, limited life cycle of bulb. Thanks to LEDs technique, now surgeon can work in low heat and great life cycle of LEDs working hours, with low power consumption & natural white day light.

## Other Important Equipment

**ICU Bridge**

**Nurse Call Systems**

**ICU Curtains**

**Wall Protection Hand Rail**

**OT Tables**

**Hospital Furniture**

## Medical Gas Pipeline System

We offer a complete engineering solution for Medical Gas Pipeline System (MGPS) in various hospitals. With wide experience, we assure the provision of reliable as well as safe medical gas pipeline system.

A centralized Medical Gases Pipe line Systems (MGPS) is today recognized as a basic life support infrastructural requirement of a hospital. It helps maintain the hygiene in the high-risk areas such as OT, ICU, ICCU and Nursery and saves the effort involved in dragging cylinders. During an emergency, when a cylinder is called for the cylinder may turn out to be empty, the cylinder key may not be traceable or the attached flow meter may be damaged due to the cylinder falling. There is therefore a chance that crucial minutes are lost fully or partially resulting in a completely avoidable hypoxia to the patient.

MGPS ensures uninterrupted supply to the life saving oxygen and/or a vacuum facility to help a clinician/caregiver save his/ her patient without anxiety.

### Our Medical Gas Pipe line System includes :

- Manifold Systems
- Fully Automatic
- Control Panel
- Semi-Automatic
- Control Panel
- Oxygen Flow Meter
- with Humidifier
- Bottle
- Suction Jar
- with Regulator
- OT Pendant
- Suction Trolley
- Isolation Valve Box

# Medical Gas Pipeline System

Digital Medical Gas Alarm

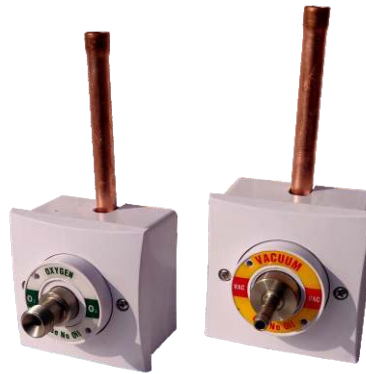

Analog Medical Gas Alarm

Vertical Bed Head Panel

Medical Gas Outlet (Amico Type)

Medical Gas Outlet (B.S. Type)

Medical Gas Outlet (Parkodex)

Oxygen Flow Meter  
with Humidifier Bottle

Ward Vacuum Unit

Theatre Suction Trolley

Gas Manifold with Control Panel

We install pipeline systems for the distribution of **medical gases, vacuum, anesthetic gases** to produce breathable air in accordance with the international standards.

## ICU/CCU Setup

Pulling the resources together, while maintaining the best possible workflow, supports an efficient healing environment, including one for early patient mobility.

- Staff safety
- Working environment
- Reducing cost
- Enabling effective care

## Neonatal ICU Setup

A neonatal intensive care unit (NICU), also known as an intensive care nursery (ICN), is an intensive care unit specializing in the care of ill or premature newborn infants. Our expert team specializes in setup of NICU.

**We provide best services for ICU/CCU Setup. We are having well trained team for ICU / CCU Setup.**

## ICU Curtains

## Anti-Bacterial Flooring

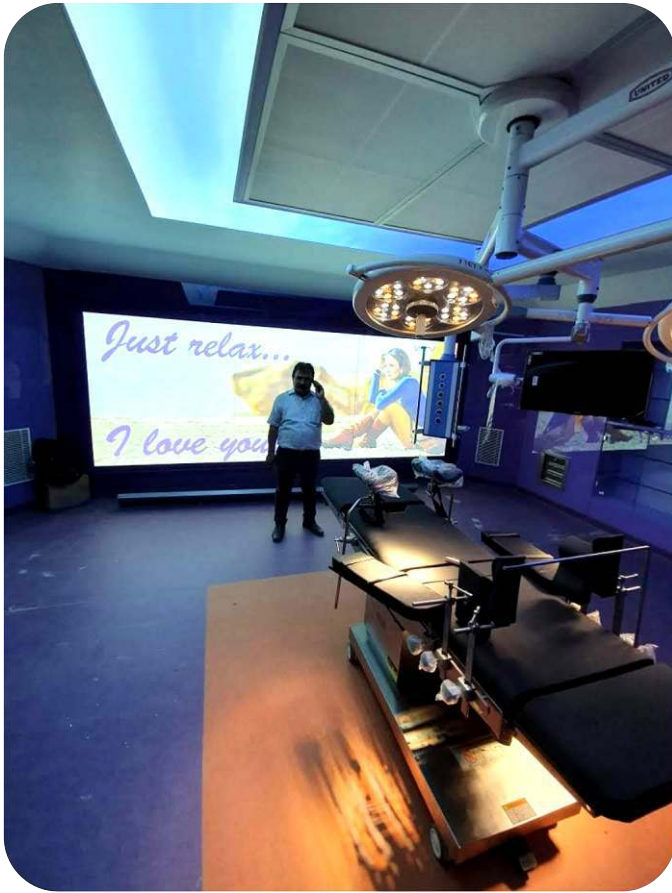

We provide Hospital Flooring that ensures high durability and the highest standards of Antibacterial and Antifungal properties. Our flooring basic feature is its anti bacterial composition, it is also known to set new benchmarks in toughness and slip-resistance meeting and exceeding R10 standards and are perfect for high traffic areas.

We ensure that they have a long lifespan and can take regular abuse of high traffic OPD areas, surgical room flooring and other special flooring applications. The flooring is offered in finishes ranging from ultra matt to super high gloss depending on the interiors of the hospital and color schemes.
